

HEALTH, CLEANING, & DISINFECTING PROTOCOLS AT INDIAN HILLS CAMP

All guest areas are cleaned, sanitized, and turned over in-between each stay, using disinfectant chemicals and procedures in accordance with the EPA's list of Disinfectants for Use Against SARS-CoV-2. We perform a complete clean and sanitizing of the high-traffic areas, restrooms, and the camp office.

All Indian Hills Camp staff will practice good social distancing guidelines as established by county government, as well as implementing recommendations from the CDC. All guests are asked to bring a personal face covering with them to camp. Most camp activities will not require face coverings as they are outside with ample space to distance. However, all staff will wear face coverings when social distancing is not possible or if there is a potential risk to a camper or staff member. We ask that all guests practice the same protocol (Example: when harnessing or being harnessed for the zipline ; when hanging out with people outside your immediate group)

Activity areas and equipment will be cleaned and sanitized after each session. We will detail and deep clean after each group/program session, including disinfecting and sanitizing mattress before each new camper arrival.

During your stay at Indian Hills Camp, our staff will perform daily housekeeping checks for meeting rooms, dorm rooms, and restrooms that are currently in use. These checks include sanitization of high touch areas like door knobs, light switches, faucets, hand rails, etc. In addition to sanitizing, trash will be taken out and paper supplies will be restocked.

We care about your health and safety at camp. We welcome any questions or concerns you may have regarding our cleaning and disinfecting procedures and protocols.

We perform a complete clean and sanitizing of the high-traffic areas, restrooms, and the camp office. We also perform a detailed, deep clean at the end of each group/program session, including mattress disinfection and sanitization before each new camper arrival.
